DETAILED ACTION

Non-Responsive Amendment

1. The amendment filed on 04/13/2006 canceling all previously elected and examined claims drawn to the elected invention and presenting new claims of a non-elected invention is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention for the following reasons:

- I. Claims 1-9 and 14-15, drawn to image rotation, classified in class 345, subclass 649.
- II. Claims 16-19, drawn to the architecture and system of a mobile terminal with a camera, classified in class 348, subclasses 231.99 and 333.01.

1. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

2. In the instant case, invention I has separate utility such as in a system that does not include the architecture and system of a mobile terminal with a camera.

3. Similarly, invention II has separate utility such as in a system that does not include an mobile terminal for image rotation.

4. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David H. Chu whose telephone number is (571) 272-8079. The examiner can normally be reached on M-F 8am-5pm.
